

# Do You TEI?

## A SURVEY OF TEXT ENCODING PRACTICES IN LIBRARIES

[http://www.surveymonkey.com/s/tei\\_in\\_libraries](http://www.surveymonkey.com/s/tei_in_libraries)

### BACKGROUND

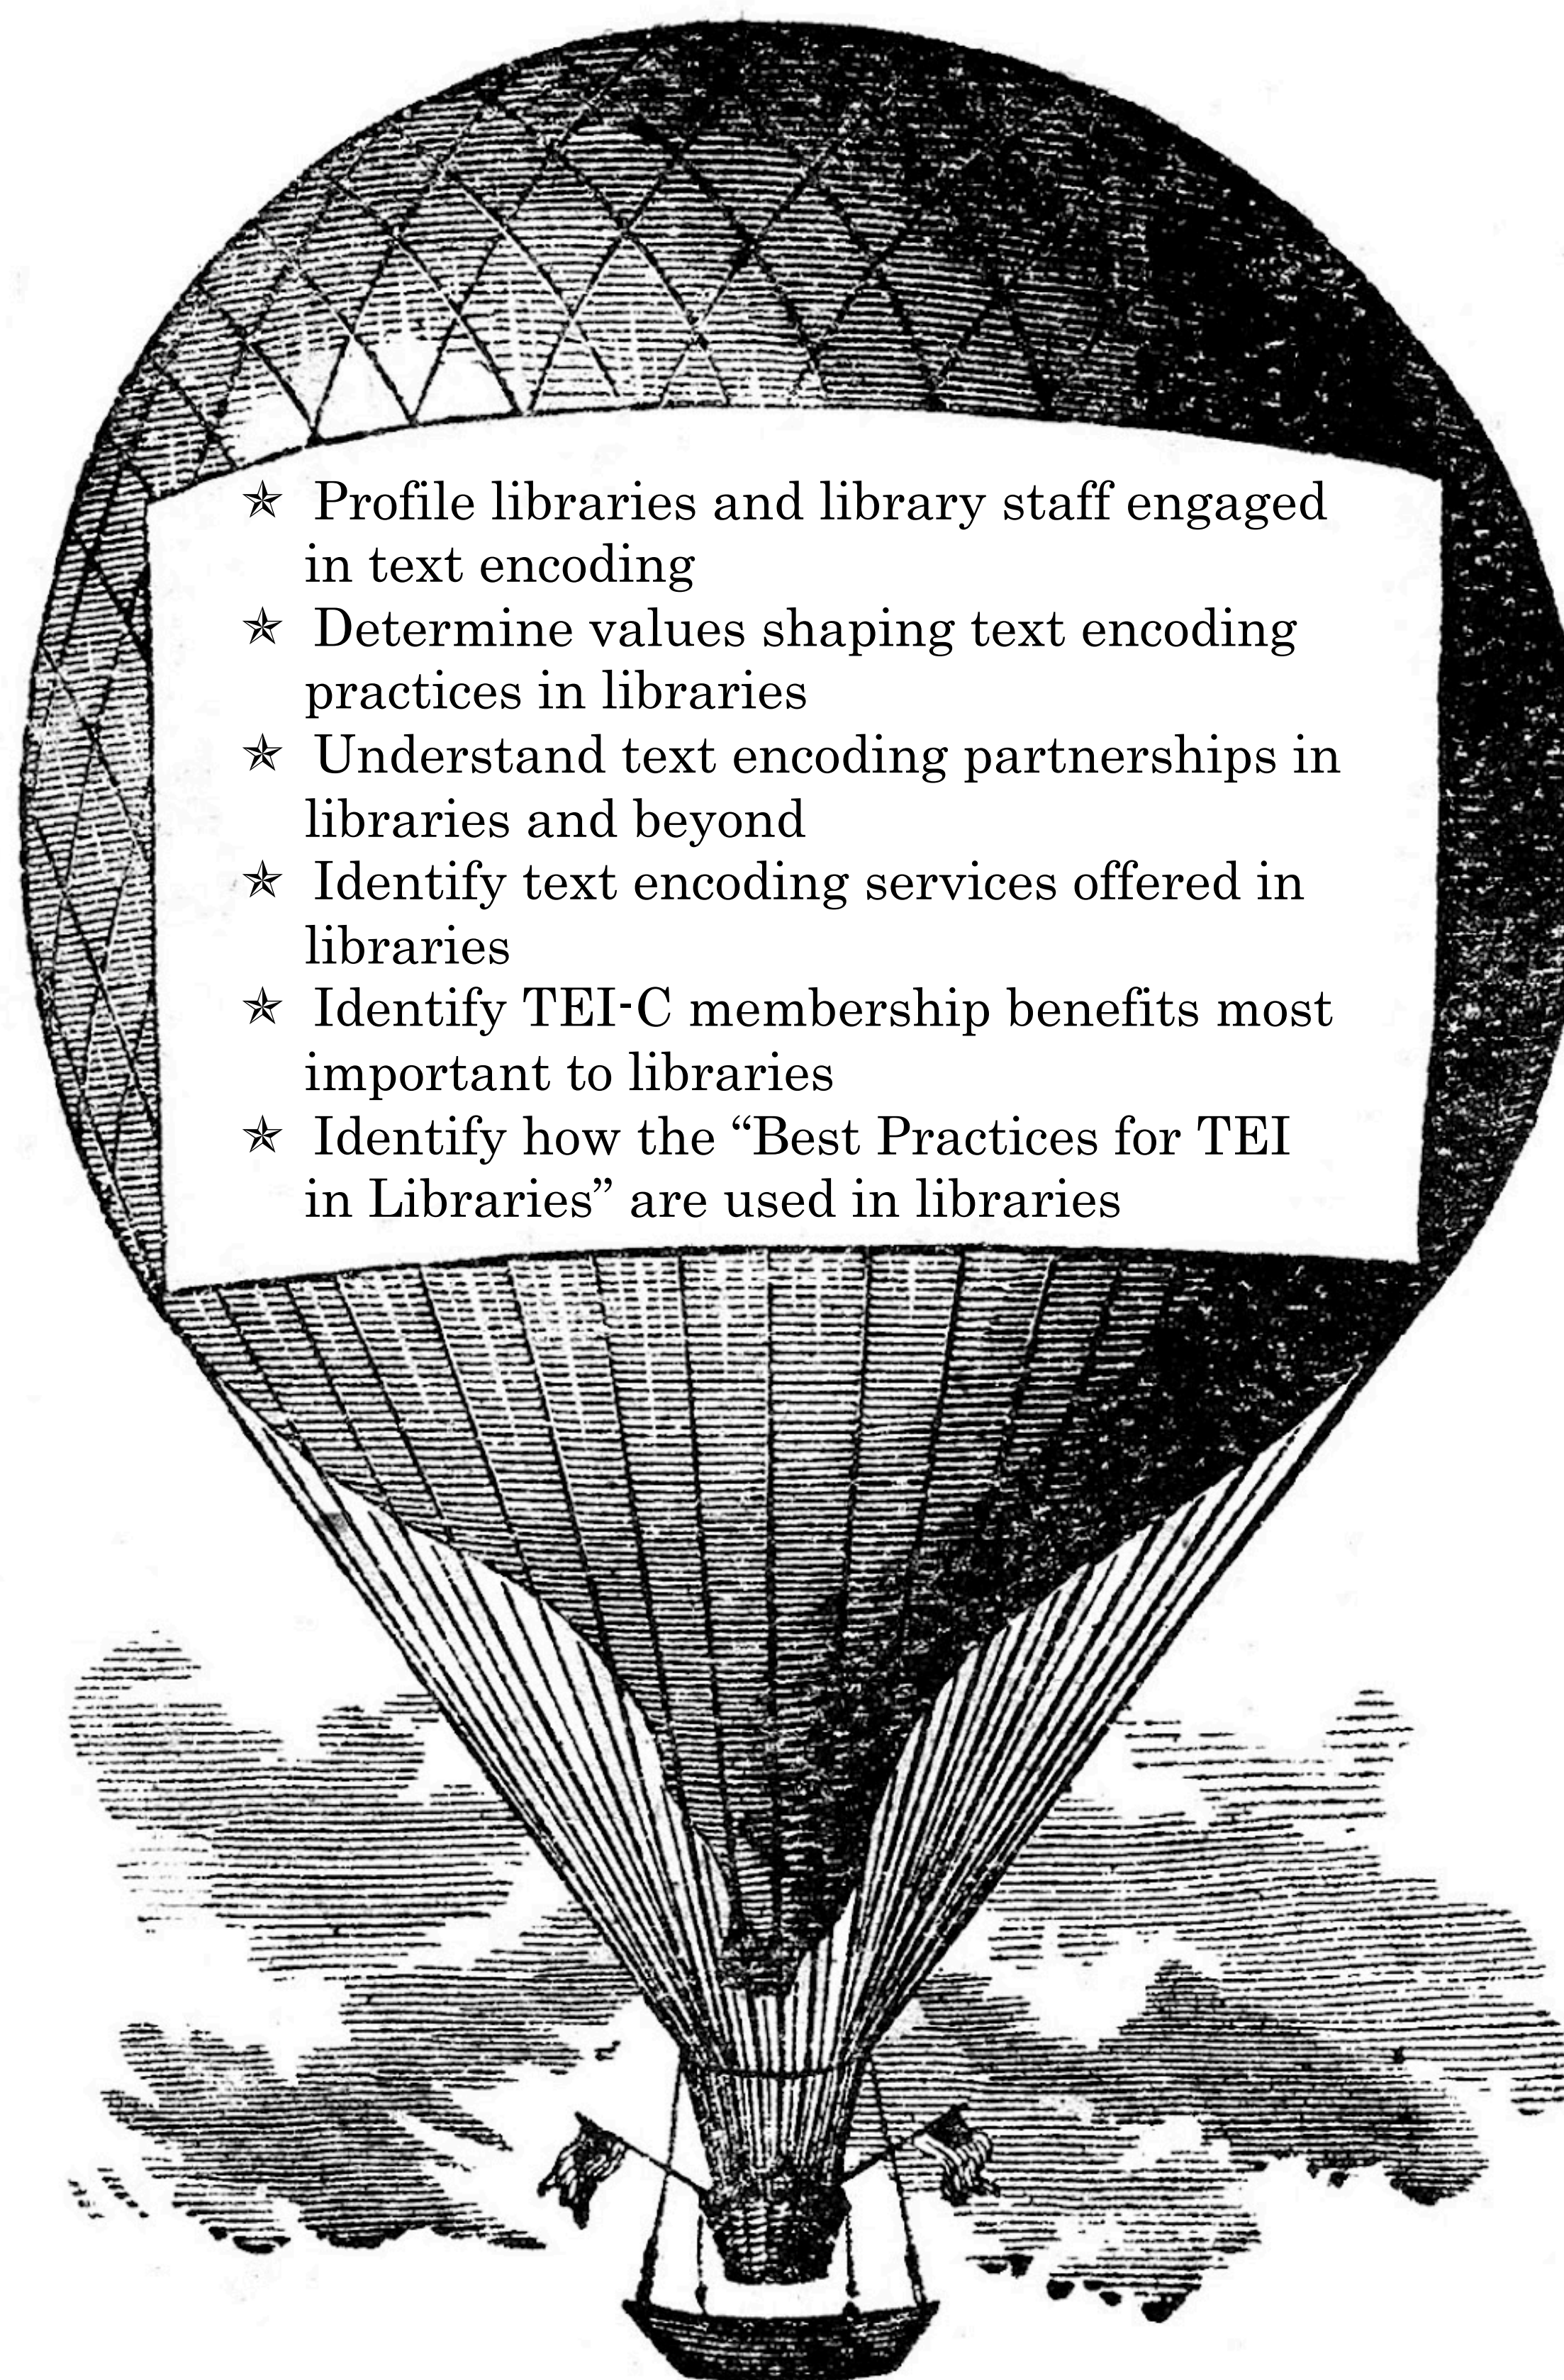

Following on papers, presentations and discussions that resulted from the theme of the 2009 Conference and Members' Meeting of the TEI Consortium, "Text Encoding in the Era of Mass Digitization," the launch of the AccessTEI program in 2010, and the recent release of the "Best Practices for TEI in Libraries" in 2011, it behooves us—stewards of text encoding initiatives in academic libraries—to better understand if and how text encoding practices have changed as a result of mass digitization initiatives, declining budgets, and an increased emphasis on "productionizing" digital library services.

### METHODOLOGY

- ★ Online survey
- ★ Posted from **November 4, 2012 to January 31, 2013**
- ★ No more than **30 minutes to complete**
- ★ Consists of study information, determination of eligibility, background info about the institution (type of library, size, attitudes) & text encoding practices
- ★ **Personal information is not being collected** in this survey
- ★ Recruiting **librarians and libraries staff** via listservs, social media, etc.
- ★ Seeking a non-probability sample of respondents following a **quota sample of 200 respondents**
- ★ Targeting communities of practice rather than individuals to minimize bias that may occur
- ★ **Take our survey!**

### GOALS

### BENCHMARKS

The following data points gathered from raw data sources or publications will be used to compare/contrast, and, if possible, correlate findings from the online survey:

- ★ TEI-C membership profile of library institutions from 2005–2012
- ★ Evolution/devolution of electronic text centers within libraries from as early as 2000 to present
- ★ Study by Siemens et al., "Understanding the TEI-C Community: A Study in Breadth and Depth, Toward Membership and Recruitment," presented at the 2008 TEI Conference and Members' Meeting, and subsequent publication in the *Journal of the Text Encoding Initiative*, "The Apex of Hipster XML GeekDOM" (<http://jtei.revues.org/210>)
